ESTABLISHED 1887 BY J. H. H. BOYD

Forest and Shade Trees
Ornamental Shrubs
McMINNVILLE, TENNESSEE

Foreword

Since 1887, when this nursery was founded by J. H. H. Boyd, our catalogues have often gone to persons who have never purchased stock of us, but who, as prospective customers, we should be glad to have become thoroughly acquainted with us, our products, equipment and our ability and facilities to promptly fill all orders with properly grown, healthy plants at correct prices.

We have planted, near our office, some three hundred acres in shade trees, evergreens and ornamental shrubs, so the proper growing of these products have our personal supervision.

The climate and soil are ideal for our business of growing plants. The growing seasons are long, the Winters sufficiently cold to thoroughly harden the plants for shipment in safety.

Boyd Brothers, sons of the founder of our business, are still in active control of all operation and continue to adhere to the principles of fair dealings inculcated in the beginning.

Our Storage Houses were built for the purpose and keep stock in splendid condition. Being only about one block from the depot enables us to ship orders with the least possible delay.

Tennessee stands fifth in the ranks of Nursery producing States. Each year we make thousands of shipments to Northern climates and letters from these customers prove that our line of Hardy Ornamental Shrubs, Shade Trees and Evergreens, etc., do splendidly in that climate. There are but few varieties that will not thrive in the North and those are so noted in the Catalogue.

It has been a genuine satisfaction to serve our many thousands of customers and we are grateful to them for the support which has enabled us to grow and render even greater service.

A selection of things to plant is easy to make from this Catalogue. We have tried to make the descriptions as briefly as possible and the Catalogue as a whole both interesting and helpful.

An increase in satisfaction, beauty and commercial value can be had by planting the Home Grounds. We are here to serve you.

Sincerely,

FOREST NURSERY COMPANY, Inc.

Orders and Terms

ORDERS.—Write plainly and give explicit directions as to address and mode of shipment; otherwise we will forward according to our best judgment. All goods travel at purchaser's risk. We assume no responsibility for the goods after delivery to the forwarding companies.

We use every care to secure prompt delivery, but we are not liable for delays or damage in transit. Our responsibility in this respect ends upon delivery in good order to transportation company, but we will gladly render all the aid we can in case claim becomes necessary.

CLAIMS, to receive consideration, must be made within ten (10) days of receipt of goods.

GUARANTEE.—We are very careful to keep each variety true to name as labeled, and are ready at any time to replace, on proper proof, any that may prove otherwise, free of charge, or refund the amount paid, but it is mutually agreed between the purchaser and ourselves that we shall at no time be liable for an amount larger than the original purchase price.

TERMS.—Cash with order, unless otherwise arranged. Six per cent interest charge on overdue bills. Five plants at 10 rates; 50 at 100 rates.

All quotations in this list are net for the goods packed—no extra charges for packing and delivering to carriers here, unless otherwise agreed on. Customer pays carriage charges. If delayed, or lost on the road, notify us, and we will do all possible to get it through, or collect claim, but are not responsible for carrier's neglect. We advise Express Shipments, as cost is little more than Freight on small lots, and stock gets through quicker and safer. Light packages can go Parcel Post. We add postage to bill.

Everything is offered subject to being unsold on receipt of order and subject to shortage or failure of crops or other causes beyond control. By placing orders buyers are considered to agree with these terms.

Certificate of inspection will be sent with each shipment.

Members of The American, Southern, Southwestern and Tennessee Associations of Nurserymen.

REFERENCE.—Dun or Bradstreets, any Bank or Business House in McMinnville.

Forest and Shade Trees

Shade trees are always an attractive setting for the house. They are necessary too, to add cool comfort to the hot summer days. Our supply is limited on most items and only offer them in small quantities.

AESCULUS Octandra—Yellow Buckeye.

A tree of slow growth, yet very attractive in its roundish form with large leaves that are conspicuous in early summer. Yellow flowers in May.

	Each	Per 10
18 to 24 inch.....	\$.20	\$1.50
2 to 3 feet.....	.35	3.00
3 to 4 feet.....	.50	4.50

AILANTHUS Glandulosa—Tree of Heaven.

Extremely rapid growing, open-headed tree. Valuable for street planting, as it stands smoke and dust well. Greenish flowers in June.

	Each	Per 10
3 to 4 feet.....	\$.35	\$3.00
4 to 6 feet.....	.60	5.00

AMELANCHIER—"Service—June Berry."

Small tree, or large shrub. Round top, branches small and spreading, in early Spring produces white cherry-like blossoms, red fruit of good flavor.

	Each	Per 10
3 to 4 feet.....	\$.65	\$6.00
4 to 6 feet.....	.90	8.00

ANDROMEDIA Oxydendron—Sourwood.

A very handsome, bushy tree rarely taller than 20 feet. Even when very small, bears masses of small white flowers. The foliage is its best feature; the abundant green leaves of summer turning to scarlet in the fall. One of the beautiful things worth planting in every garden.

	Each	Per 10
18 to 24 inch.....	\$.30	\$2.50
2 to 3 feet.....	.45	3.50
3 to 4 feet.....	.65	5.00

ASH—Fraxinus.

Common native Ash. This is another tree of quick growth; a very healthy tree, spreading branches with light green foliage.

	Each	Per 10
4 to 6 feet.....	\$.65	\$6.00
6 to 8 feet.....	.90	8.00
8 to 10 feet.....	1.50	12.50

BEECH American—Fagus Americana.

Our noble native forest tree, with silvery bark, fine spreading growth and symmetrical, rounded head. Especially attractive in spring with its leaves of tender green. Its silvery bark is ornamental in winter.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.50
3 to 4 feet.....	.30	2.50
4 to 6 feet.....	.60	5.00

BETULA Alba—White Birch.

The birches like moist homes and prefer the banks of streams where their irregular branching habit makes them picturesque, especially their conspicuous bark in winter. The White Birch is a small, or medium-sized tree with white bark and small, dark-green leaves that turn pale yellow in the fall. Often makes two or more stems from the ground. This Birch will thrive in dry soil.

	Each	Per 10
2 to 3 feet.....	\$.40	\$3.50
3 to 5 feet.....	.50	4.50

Nigra—River Birch

The familiar Birch with torn and ragged bark that is often seen along the banks of streams. A graceful, moisture-loving tree that should be in all lowland plantings.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.50
3 to 4 feet.....	.35	3.00
4 to 6 feet.....	.60	5.00
6 to 8 feet.....	1.00	9.00

CARPINUS Caroliniana—American Hornbeam.

A bushy, low growing tree with slender branches and bluish-green leaves, that will stand any amount of trimming and is thus excellent for specimen plants or for hedging.

	Each	Per 10
3 to 4 feet.....	\$.35	\$3.00
4 to 6 feet.....	.60	5.00
6 to 8 feet.....	1.00	9.00

CATALPA Bungei—Umbrella Catalpa.

To make these, we bud or graft on straight stems the dwarf variety, which makes many short spreading branches. A roundish head without adding to the height. The foliage is very pleasing and the effect obtained, when planted in pairs along walks and driveways or entrance is greatly admired.

	Each	Per 10
4 to 6 feet, 1-year heads.....	\$1.25	\$11.00
6 to 7 feet, 2-year heads.....	2.00	15.00
6 to 8 feet, 3-year heads, select.....	2.75	25.00

Speciosa—Western Catalpa.

A large, handsome tree with immense, tropical-looking leaves and big clusters of white flowers with purple center. Is very quick-growing and makes a fine tree for the lawn. Does well even in poor soil.

	Each	Per 10
2 to 3 feet.....	\$.15	\$1.25
3 to 4 feet.....	.20	1.50
4 to 5 feet.....	.35	2.75
5 to 6 feet.....	.50	3.50

Forest and Shade Trees (Continued)

CELTIS Occidentalis—Hackberry.

Nettle Tree. A native tree, whose worth and beauty are too often overlooked. Of strong growth with full, spreading top and abundant leaves. Has attractive and edible fruits, or berries, of small size. Excellent for street planting and ideal for lawns.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.50
3 to 4 feet.....	.35	3.00
4 to 6 feet.....	.50	4.50

CERCIS Canadensis—Red Bud or Judas Tree.

A small tree, branching irregularly from the ground, spreading in habit, with smooth, heart-shaped leaves and branches cover their whole length in early spring before the leaves are out, with small pink flowers. A tree for the lawn.

	Each	Per 10
3 to 4 feet.....	\$.30	\$2.50
4 to 5 feet.....	.50	4.00
5 to 6 feet.....	.75	6.00
6 to 8 feet.....	1.00	9.00
8 to 10 feet.....	2.00	15.00

CHIONANTHUS Virginica—White Fringe Tree.

A large, very ornamental native tree-like shrub, covered in early April with pure white flowers in long, fringe-like effect. A shrub of unusual beauty.

	Each	Per 10
18 to 24 inch.....	\$.75	\$6.00
2 to 3 feet.....	1.25	10.00

CLADRASTIS Lutea—Yellow Wood

A pretty, low tree with small, egg-shaped leaflets and white flowers in graceful, drooping cluster. It is of very slow growth.

	Each	Per 10
18 to 24 inch.....	\$.35	\$3.00
2 to 3 feet.....	.45	4.00
3 to 4 feet.....	.60	5.00

CORNUS Florida—White Flowering Dogwood.

A native tree of regular habit, with spreading open top; it produces large, snowy white flowers in May before the leaves appear. The foliage is attractive all summer and in the fall colors beautifully with red berries that hang on well into the winter.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.50
3 to 4 feet.....	.35	3.00
4 to 5 feet.....	.50	4.00
5 to 6 feet.....	.75	6.00

CORYLUS Americana—Hazelnuts

The common, native Hazelnuts grow well in this section, and produces large lots of nuts, which are sweet and of fine flavor. Very hardy.

	Each	Per 10
2 to 3 feet.....	\$.30	\$2.50
3 to 4 feet.....	.50	4.00

ELM. American—Ulmus Americana.

A tall and stately tree with spreading top, combining great strenght with peculiar grace, the American White Elm is one of our grandest native trees. Reaches great size and attains to great age. An ideal tree for the lawn, casting wide stretches of shade while for roadside planting or for street-lining, the mature Elms will meet above the traffic and form arches over shaded lanes.

	Each	Per 10
3 to 4 feet.....	\$.35	\$3.00
4 to 6 feet.....	.50	4.00
6 to 8 feet.....	1.00	9.00

Racemosus—Corkbark Elm.

This native Elm is different from other varieties in having very rough, broken, cork-like bark along the trunk and largest branches. An interesting and attractive tree.

	Each	Per 10
3 to 4 feet.....	\$.35	\$3.00
4 to 5 feet.....	.50	4.00
5 to 6 feet.....	.75	6.50

HAMAMELIS Virginiana—Witch Hazel.

This is one of our best native small trees, or shrubs, making grand growth, much like the Hazel, showy yellow flowers appear after the ripening of the leaves in November, when other shrubs are dormant. Will thrive in partially shaded places. Very hardy.

	Each	Per 10
2 to 3 feet.....	\$.35	\$3.00
3 to 4 feet.....	.50	4.00

LINDEN American—Tilia Americana.

A large tree of regular outline, erect and rather formal, with a dome-shaped head. The leaves are dark green and light underneath, turning to yellow in the fall. The flowers are cream-colored and inconspicuous but very sweet. The Linden is popular for street planting and for ornamental shade.

	Each	Per 10
3 to 4 feet.....	\$.50	\$4.00
4 to 6 feet.....	.75	6.50
6 to 8 feet.....	1.25	10.00

LIQUIDAMBER—Sweet Gum

A handsome native tree of stately growth, with corky bark. Leaves resemble those of the Maples, but are more star-shaped, and of a glossy green color, turning to a deep purplish-crimson in Fall.

	Each	Per 10
2 to 3 feet.....	\$.35	\$3.00
3 to 4 feet.....	.50	4.00
4 to 6 feet.....	.75	6.00

LIRIODENDRON Tulipifera—Tulip Tree

Tulip Poplar, large and stately tree, suitable for lawn or avenue planting. Quick-growing too, making a compact, pyramidal head. The leaves are dark green turning to yellow in the fall. It has greenish-yellow flowers shaped like a tulip. A healthy, clean, beautiful tree that does well in all sections.

	Each	Per 10
2 to 3 feet.....	\$.35	\$3.00
3 to 4 feet.....	.45	4.00
4 to 6 feet.....	.65	6.00
6 to 8 feet.....	.90	8.00

Forest and Shade Trees (Continued)

LOCUST Black—*Robinia Pseudoacacia*.

A familiar tree of quick growth, thriving in almost any soil and any location. Small sizes can be furnished in quantity for reforestation; write for special prices on large lots.

	Each	Per 10	Per 100
18 to 24 inch.....	\$.05	\$.40	\$3.00
2 to 3 feet.....	.07	.60	5.00
3 to 4 feet.....	.10	.80	7.00
5 to 6 feet.....	.25	2.00	
6 to 7 feet.....	.35	3.00	

Honey Locust—*Gleditsia Triacanthus*.

Of quick growth, very hardy, and as it can be clipped into shape and bears numerous strong thorns, it makes an impenetrable farm-hedge, when planted closely. Useful rather than ornamental.

	Each	Per 10
12 to 18 inch.....	\$.25	\$2.00
18 to 24 inch.....	.30	2.50
2 to 3 feet.....	.35	3.00
3 to 4 feet.....	.60	5.00

MAGNOLIA Grndiflora—Broad-leaf Magnolia.

Southern Magnolia. The grandest of our native broad-leaf evergreen trees. Branches from the ground, spreads widely and attains a height of 30 to 40 feet. Has long, wide glossy green leaves and immense white, wax-like flowers of great fragrance. In the fall, the cones filled with scarlet seeds are attractive. Blooms from April till August.

	Each	Per 10
18 to 24 inch.....	\$1.25	\$10.00
2 to 3 feet.....	1.60	15.00
3 to 4 feet.....	2.50	22.50

Acuminata (Magnolia)

Cucumber Tree. The tallest of the Magnolias, growing rapidly to a fine pyramidal tree 60 to 90 feet high. In midsummer large creamy-white blossoms appear among the deep green leaves, and large cucumber-shaped fruits that turn bright crimson succeed them.

	Each	Per 10
18 to 24 inch.....	\$.35	\$3.00
2 to 3 feet.....	.50	4.00
3 to 4 feet.....	.75	6.50
4 to 6 feet.....	1.25	10.00

Tripetala (Magnolia)

Rarely grows taller than 30 feet. Immense leaves, 10 to 24 inches long, in clusters around the large white flowers that are followed by rose-colored fruit cones.

	Each	Per 10
18 to 24 inch.....	\$.35	\$3.00
2 to 3 feet.....	.50	4.00
3 to 4 feet.....	.75	6.50
4 to 6 feet.....	1.25	10.00

MELIA—Texas Umbrella Tree.

A distinct and valuable form of the Chinaberry. The branches start very much like the stays of an umbrella and form a dense, round, umbrella-like head. The foliage is very dense and a cooling

dark green and while serviceable for shade, the tree is unique and highly ornamental in appearance. Fragrant lilac-colored flowers.

	Each	Per 10
18 to 24 inch.....	\$.10	\$.80
2 to 3 feet.....	.15	1.25
3 to 4 feet.....	.35	2.50
4 to 6 feet.....	.50	4.00

MULBERRY

With the exception of the Weeping variety, Mulberries should not be planted on the lawn nor near the sidewalk. Mulberries are for the chicken-yard and the hog-pen, both chickens and hogs appreciate the sweet berries and so do the birds.

MULBERRY Black—*Morus*.

A low-growing tree, large black fruit ripens in July.

	Each	Per 10
18 to 24 inch.....	\$.10	\$.80
2 to 3 feet.....	.15	1.25
3 to 4 feet.....	.25	2.00

Russian Mulberry—*Morus Tartarica*.

Very hardy, fairly low growing with a shapely, round head and bearing quantities of small, sweet berries.

	Each	Per 10
18 to 24 inch.....	\$.10	\$.80
2 to 3 feet.....	.15	1.25
3 to 4 feet.....	.25	2.00

Hick's Everbearing Mulberry, also Downings.

Taller than the Russian, not so compact and with larger leaves. The berries ripen over a period of about four months, are abundant, large, black and sweet.

	Each	Per 10
3 to 4 feet.....	\$.60	\$5.00
4 to 5 feet.....	.75	6.00

Tea's Weeping Mulberry.

This is an ornamental Mulberry; the weeping top is budded or grafted at the top of a straight stem of 5 or 6 feet and branching outward and downward, soon reaches to the ground on all sides; a fountain-like effect of green leaves. As a lawn ornament, the best of the Weeping Trees.

	Each	Per 10
1 year heads.....	\$2.00	
2 year heads.....	3.50	

MAPLES Silver Leaf—*Acer Dasycarpum*.

A very rapid-growing tree of graceful, spreading habit, with leaves of light green above and silver underneath. Desirable for either lawn or street planting. Will grow in poor and dry soil.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.50
3 to 4 feet.....	.40	3.50
4 to 6 feet.....	.65	6.00
6 to 8 feet.....	.90	8.00
8 to 10 feet.....	1.50	

Forest and Shade Trees (Continued)

Red, or Scarlet Maple—*Acer Rubrum*.

Excellent habit, scarlet flowers in early spring; dense foliage, gorgeous color in autumn, will thrive in wet situations.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.50
3 to 4 feet.....	.40	3.50
4 to 6 feet.....	.65	6.00
6 to 8 feet.....	.90	8.00
8 to 10 feet.....	1.50	

Sugar Maple—*Acer Saccharum*.

Good for the large lawn, but ideal for street planting. One of our stateliest native trees, growing to large size, full and compact, with leaves of cool green in spring and summer and taking on the orange and scarlet tints with fall. Its sap makes maple sugar.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.50
3 to 4 feet.....	.40	3.50
4 to 6 feet.....	.65	6.00
6 to 8 feet.....	.90	8.00
8 to 10 feet.....	1.50	

Box Elder—*Acer Negundo*.

Ash-leaved Maple. A very rapid-growing tree, with widely spreading branches. The leaves are light green and very pale green underneath, the coloring affording marked contrast to the other Maples and very effective in mass plantings. Withstands drouth and cold.

	Each	Per 10
2 to 3 feet.....	\$.40	\$3.00
3 to 4 feet.....	.50	4.00
4 to 5 feet.....	.65	5.50

Norway Maple—*Acer Platanoides*.

One of the best shade trees for all purposes, whether in the lawn or roadside; a favorite street tree. Grows to large size and is of neat, compact habit with a rounded head.

	Each	Per 10
2 to 3 feet.....	\$.40	\$3.00
3 to 4 feet.....	.50	4.00
4 to 5 feet.....	.65	5.50

NYSSA Multiflora—Sour Gum.

An attractive and popular native tree of easy growth, admired for the gorgeous scarlet coloring of the leaves and its dark blue berries in the fall.

	Each	Per 10
18 to 24 inch.....	\$.20	\$1.50
2 to 3 feet.....	.30	2.00
3 to 4 feet.....	.40	3.00
4 to 6 feet.....	.65	5.00

OSAGE 'Orange.

An extremely hardy tree, whose wood, being practically indestructible, is valuable for fence-posts. For farm-hedging, it is good because with clipping, when planted close, it can be held to any desired height and soon forms an impassible barrier. Write us for prices on quantity lots.

	Each	Per 10
18 to 24 inch.....	\$.10	\$.80
2 to 3 feet.....	.15	1.25
3 to 4 feet.....	.30	2.50

PERSIMMON American—*Diospyros Virginiana*.

A native of the southern states, but will thrive and ripen its fruit as far north as the Great Lakes. The tree reaches a height of 30 feet. The fruit is not large, one-half to one-inch in diameter and must be fully ripe to become edible. A valuable ornamental tree. Will thrive on the poorest soil.

	Each	Per 10
18 to 24 inch.....	\$.15	\$1.00
2 to 3 feet.....	.20	1.50
3 to 4 feet.....	.25	2.00

Japanese Persimmon.

The tree is a vigorous grower, and an early and most prolific bearer, fruit larger than the common American Persimmon.

	Each	Per 10
2 to 3 feet.....	\$.40	\$3.50
3 to 4 feet.....	.60	5.00

POPULUS—Poplars.

Inexpensive, hardy, rapid-growing trees very much in use for quick or temporary effects. Easy to transplant, thriving under almost every condition.

Balm of Gilead—*Populus Candicans*.

A tall tree with spreading branches and leaves dark green above and nearly white beneath. A very handsome, quick-growing tree.

	Each	Per 10
2 to 3 feet.....	\$.25	\$2.00
3 to 4 feet.....	.35	3.00

Lombardy Poplar—*Populus Nigra*.

A tall, shaft-like column of a tree that grows quickly, like all Poplars, and often reaches 80 to 100 feet in height. The Lombardy Poplar is not for shade, but for ornament, making a fine effect when planted along driveways; and when planted close together the trees make a thick, very high screen. Branched always from the ground up.

	Each	Per 10
2 to 3 feet, branched.....	\$.20	\$1.50
3 to 4 feet, branched.....	.25	2.00
4 to 6 feet, branched.....	.50	4.00
6 to 8 feet, branched.....	.75	6.00

New Chinese Lombardy Poplar.

Tall-grower, branches erect and closely pressed to the trunk. Foliage dark green.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.50
3 to 4 feet.....	.30	2.50
4 to 6 feet.....	.50	4.00
6 to 8 feet.....	.75	6.00
8 to 10 feet.....	1.00	9.00

Silver Poplar—*Populus Alba*.

A very quick-growing tree with silvery leaves. Will thrive in almost any soil and often where most other trees fail.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.50
3 to 4 feet.....	.30	2.50

Forest and Shade Trees (Continued)

Carolina Poplar—*Populus Monilifera*.

If quick results are wanted rather than permanent value, plant Carolina Poplars. Planted close, they make a quick, dense screen. Planted some distance apart, alternating with some slower-growing hardwood trees, the Poplars will furnish shade until the others are large enough to cut the Poplars out. That is often done.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.50
3 to 4 feet.....	.30	2.50

RHAMNUS Caroliniana—Buckthorn.

A native hardy, vigorous small tree, or shrub, with handsome foliage and showy berries, usually grows 6 to 10 feet.

	Each	Per 10
2 to 3 feet, transplanted.....	\$.30	\$2.50
3 to 4 feet, transplanted.....	.35	3.00

SASSAFRAS—*Varifolium Officinale*.

A native tree of irregular growth, seldom seen in ornamental plantings, but worthy of more consideration. The distinctive foliage of varied outline assumes beautiful tints in the Autumn and the horizontal arrangement of the twiggy branches presents a very attractive appearance.

	Each	Per 10
2 to 3 feet.....	\$.20	\$1.75
3 to 4 feet.....	.30	2.50
4 to 5 feet.....	.40	3.50

SYCAMORE American—*Platanus Occidentalis*.

A hardy native tree of lofty height, often reaching 100 feet. Wide-spreading with large leaves green above and greyish below. The bark peels annually and the new bark is silvery white. Especially recommended for street planting.

	Each	Per 10
18 to 24 inch.....	\$.30	\$2.00
2 to 3 feet.....	.40	3.00
3 to 4 feet.....	.60	5.00

TAXODIUM Distichum—Common Bald Cypress.

This tree grows in a pyramidal shape. Very shapely tree, foliage light green and feathery. Splendid lawn tree.

	Each	Per 10
18 to 24 inch.....	\$.40	\$3.50
2 to 3 feet.....	.60	5.00
3 to 4 feet.....	.85	7.00

WILLOWS—*Salix*.

All the Willows are of peculiarly graceful habit. Their distinct form add beauty to any planting. They thrive best in moist soils and they are most at home by the water's edge. They lend their uses to the most artistic effects in landscape plantings. All varieties grow fast.

Basket Willow.

This is a new Willow with us, purchased from the Department of Agriculture. It is an upright grower, from 10 to 20 feet in height.

	Each	Per 10
2 to 3 feet.....	\$.25	\$2.00
3 to 4 feet.....	.35	3.00

Weeping Willow—*Salix Babylonica*.

Tall, spreading, with long, drooping branches and narrow, dark-green leaves. An imposing tree of much graceful beauty. Prefers a moist location and is at its best when planted near a pond or stream.

	Each	Per 10
2 to 3 feet.....	\$.25	\$2.00
3 to 4 feet.....	.35	3.00
4 to 6 feet.....	.50	4.00

Pussy Willow—*Salix Caprea*.

A small, shrubby tree, or large bush, with numerous upright, branches, not weeping. The catkins are very large, the buds swelling to a great size early in the spring; silvery grey and often with a pinkish tinge. Highly prized for cutting and furnishing the garden's first spring beauty to house decoration. Florists buy the branches in quantities for reselling. A pretty landscape or garden effect.

	Each	Per 10
2 to 3 feet.....	\$.25	\$2.00

Nut Trees, Hardy Field Grown

HICKORYNUTS. *Laciniosa*. Shellbark.

A vigorous-growing tree with dense green leaves. Bears small nuts with edible sweet kernels.

	Each	Per 10
12 to 18 inch, S.....	\$.20	\$1.75
18 to 24 inch, S.....	.35	3.00

PECANS, Paper Shell.

Pecans are highest quality and highest priced nuts in the world. Pecan nuts are in demand constantly at good prices for culinary purposes and for making of candies, etc. The Pecan is long lived. Budded and grafted trees, if given the proper attention, will begin to bear 5 years after being set out, but paying results cannot be expected of the trees before 8 years of age. A ten year old tree should produce from 15 to 20 pounds of nuts. We have the following varieties:

Frotscher. Very large nuts, averaging from 45 to 50 to the pound. Shell very thin; can be easily cracked with the teeth; meat sweet and of fine quality, and can be removed entire from the shell.

Moneymaker. This variety combines early maturity and heavy productivity; is a good grower and remarkably free from attacks of Scab. Bud Worm and other diseases that attack a great many of the best varieties of pecans.

Schley. Medium to large; 1 1-2 to 1 7-8 inches long, Oblong, slightly flattened; shell thin; plump, rich flavor; good grower; one of the best.

Stuart. The hardest and most widely planted of the lot. Large size; quality good; shell medium thin. One of the best for general planting. Good grower; heavy bearer; excellent.

	Each	Per 10
2 to 3 feet.....	\$.50	\$4.50
3 to 4 feet.....	.75	7.00
4 to 5 feet.....	1.25	

WALNUTS, *Juglans Nigra*. Black Walnuts.

A native tree of large size. Produces large crops of delicious meaty nuts. The wood of the black walnut tree commands the highest price on the market—because of its beauty in furniture making.

WALNUTS, English.

The English Walnut requires a rich, well-drained and stony soil. Never plant in hard heavy clays, or soils which are not properly drained. The trees we offer are all grown from the best French seed, and have been transplanted.

	Each	Per 10
18 to 24 inch.....	\$.40	3.50
2 to 3 feet.....	.60	5.00

WALNUTS, *Juglans Sieboldiana*. Japan Walnut.

The tree is very handsome; has large spreading top. At three years of age the tree commences to bear. Shaped like the butternut. Shell thicker than that of the English Walnut; perfectly hardy in all parts of the country.

	Each	Per 10
6 to 12 inch.....	\$.15	\$1.00
12 to 18 inch.....	.20	1.50

Hardy Flowering Shrubs

The planting of ornamental shrubs is very largely on the increase, and this is as it should be, for with a good selection the lawn can always be beautiful. They are mostly of medium size, enabling one to plant a great variety on a small plat, and the wonderful assortment of foliage from the darkest green and purple to light orange and silver tints. This addition to the great variety in the blossoms, all unite to keep up a never-failing interest.

ABELIA *Grandiflora*. (See Broad-leaved Evergreens.)

ALMOND Pink Flowering—*Amygdalus*.

Double-flowering, not fruiting. Small shrubs whose upright branches are literally covered their entire length in earliest spring before the leaves appear, with blooms like small roses. Plant for early bloom.

ALTHEA (Rose of Sharon)—*Hibiscus Syriacus*.

The Altheas are ideal flowering shrubs, because during the hot, dry season and always from the middle of July till September, they are filled with bloom. They flower when flowers are scarce. There are not many mid-summer blooming shrubs. Altheas are the finest and showiest of them all. They are clean, healthy, hardy, free of all insect pests, grow readily and bloom freely almost anywhere and in all soils and situations. They represent a wide range of colors from pure white, through pink and red to dark purple, and both single and double. We grow a carefully selected list, including the best.

Anemoeiflora—Large, double red blooms.

Amplissima—Double, rosy red, blooming early.

Ardens—A favorite variety with double, purplish blooms.

Boule de Feu—Fine double red.

Bicolor—Attractive double white with red markings.

Hardy Flowering Shrubs (Continued)

Joan of Arc—Pure white and very double.

Lady Stanley—Semi-double, white, shaded with rose.

Pulcherimus—Flowers of variegated tints.

Peoniflora—Double.

Althea, Rose of Sharon—Single mixed colors.

BARBERRY Japanese—Berberis Thunbergi.

A plant of many uses and varied attractions. It is beautiful every month in the year. In spring the leaves are bright green, turning to deeper green in summer, in the fall the leaves take on all autumn colors of red and yellow and bronze. The small, inconspicuous flowers are fragrant; they are followed by berries that ripen a bright red and hang on nearly all winter. Barberry leaves will stand the heat and dust of summer. It makes a first-rate low hedge, works attractively into foundation and porch plantings of shrubs and is attractive enough to stand alone, although at its best in group plantings. The Japanese Barberry is the one that does not harbor wheat-rust; it is perfectly harmless. And healthy and hardy, it grows anywhere, in any soil.

HAVE A SURPLUS IN BARBERRY AND IF WANTED IN QUANTITIES CAN MAKE ATTRACTIVE PRICES.

BENZON—Spice Bush.—(See *Lindera Benzoin*.)

BUTTERFLY Bush—Buddleia (Summer Lilac.)

One of the most desirable summer-flowering shrubs. It dies down to the ground in winter, but each spring throws out four to five-foot stems in numbers, making a bushy plant covered from July until frost with delicate lilac-like flowers of dainty beauty and fragrance, attracting so many butterflies as to give it the common name. The cool, pale blue color and the constant blooming habit make this one of the best shrubs for Southern gardens. It is equally suitable in the North and succeeds anywhere. Should be in every garden.

	Each	Per 10
18 to 24 inch.....	\$.35	\$3.00
2 to 3 feet.....	.45	4.00

CALLICARPA Americana—Beautyberry.

Valuable for its lovely purple berries borne in clusters along the branches; handsome the fall and early winter. A native shrub of great beauty. These berry-bearing plants are becoming more and more popular, adding new and unusual beauty to the garden in the season when color is needed.

	Each	Per 10
18 to 24 inch.....	\$.50	\$4.00
2 to 3 feet.....	.75	6.00

COMPTONIA Asplenifolia. Sweet Fern

A low shrub with fern-like fragrant foliage, well adapted for massing on rocky banks and sandy stretches. Very hardy and ornamental.

	Each	Per 10
12 to 18 inch.....	\$.20	\$1.50
18 to 24 inch.....	.25	2.00

Hardy Flowering Shrubs (Continued)

CORNUS. Shubby Dogwood.

These plants are especially valuable for the colored berries in fall and winter and for the high coloring of the bark. All have good foliage, too. Another point is that they all thrive in shade. Fine for grouping.

Amomum—(Silky Dogwood) White flowers in June, blue berries later and dull red bark.

Lutea—(Yellow-stemmed Dogwood) With golden yellow branches, affording striking contrast to the others.

Siberica—The branches are bright red, very attractive in winter.

Stolonifera—(Red-osier Dogwood) Heavily branched and spreading with small white berries lasting into winter. The bark is bright red and very striking.

	Each	Per 10
18 to 24 inch.....	\$.25	\$2.00
2 to 3 feet.....	.30	2.50
3 to 4 feet.....	.40	3.50

CRAPE Myrtle. Lagerstroemia.

No one in the south needs to be told about the universal Crape Myrtle; it is seen everywhere and is in Southern gardens what the Lilac is in the North. In time, it makes a considerable tree. The flowers are daintily fringed and borne in immense panicles; they appear in May and continue all through the summer. We offer both the Crimson and the Pink.

	Each	Per 10
18 to 24 inch.....	\$.50	\$4.00
2 to 3 feet.....	.80	7.00
3 to 4 feet.....	1.25	10.00

CYDONIA Japonica. Japanese Quince.

One of the earliest heralds of spring, its great splash of scarlet color marking the final departure of winter. The impatient blooms are out before the leaves appear, dainty, single blooms covering the branches with dazzling red. The leaves are glossy green. It bears, but the fruits are not edible. Valuable for early blooming and bright color.

	Each	Per 10
18 to 24 inch.....	\$.50	\$4.00
2 to 3 feet.....	.80	7.00
3 to 4 feet.....	1.25	10.00

DEUTZIA.

Valuable shrubs growing well in all kinds of soils and situations, varying considerably in size and habit, but blooming alike in dainty bell or tassel-shaped flowers, borne thickly in wreaths along the branches in June. The taller sorts are used for specimens, groups, and the background of smaller shrubberies; the dwarfier, for borders or for planting near the house. All are healthy, sturdy growers, with good foliage.

Candidissima—Upright-growing, fine foliage and pure white, double flowers.

Crenata—Flowers light pink, slightly fragrant.

Fortunei—Erect branches, with handsome, broad, dark green leaves, pink flowers.

Pride of Rochester—One of the best. Strong upright grower, outer petals tinged with pink, flowers in June.

	Each	Per 10
18 to 24 inch.....	\$.30	\$2.50
2 to 3 feet.....	.40	3.50
3 to 4 feet.....	.50	4.00

ELDER. *Sambucus Canadensis*. (Common American Elder.)

This is the well-known native Elder Berry. A tall shrub with stout branches filled with pith. The small white flowers come in broad, flat heads, fragrant, opening in June. The fruit is black, ripening in August and September and borne in great quantities. Grows to six or eight feet tall. In countries where they do not have prohibition, Elderberries are said to be used for making wine of excellent quality and possessing medical qualities that correct stomach disorders. The bushes are most attractive with beauty in foliage, in bloom and in fruit.

18 to 24 inch.....	\$.40	\$3.50
2 to 3 feet.....	.75	6.00
3 to 4 feet.....	1.00	8.00

FORSYTHIAS:

An interesting group, distinct and unique. They are among the first to bloom and their bright yellow flowers seem the very spirit of spring, opening before the leaves appear. They attain an ultimate height of eight or ten feet. The leaves are especially rich green.

Fortunei—Upright and often planted as a single specimen, handsome dark green foliage, pink flowering.

Intermedia—Slender, erect, arching branches. Narrow leaves and vigorous grower. Very popular variety.

Suspensa—Long curving branches, superbly adapted for covering arches or trellises. Can be made to cover walls.

Viridissima—Brilliant green foliage, with green bark, too. Yellow flowers.

	Each	Per 10
18 to 24 inch.....	\$.30	\$2.50
2 to 3 feet.....	.40	3.50
3 to 4 feet.....	.50	4.00

Hardy Flowering Shrubs (Continued)

FLOWERING CRAB. *Malus Ioensis* (Betchel).

Double pink flowers in small clusters. Early in Spring.

2 to 3 feet.....	\$1.10	\$10.00
3 to 4 feet.....	1.50	12.50

FLOWERING Peach.

During March these double-flowering peaches are covered with a mass of beautifully formed and highly colored flowers. These trees cannot be too highly recommended for early Spring blooming. They are perfectly hardy and will thrive in any soil.

	Each	Per 10
2 to 3 feet.....	\$1.10	\$10.00
3 to 4 feet.....	1.50	12.50

FRINGE TREE Purple. (See *Rhus Cotinus*)

FRINGE TREE White. (See *Chionanthus Virginica*)

HAMAMELIS. (See *Witch Hazel—Shade Trees*)

HIGH BUSH CRANBERRY. *Viburnum Opulus*. (See *Viburnums*)

HONEYSUCKLE. *Lonicera*. (Bush)

This group includes only the Bush Honeysuckles, not the climbing vines. The bush honeysuckles are upright and bushy, with small fragrant flowers, followed by showy berries that last throughout the fall. They make very desirable and attractive hedges.

Bella Albida—A handsome new hybrid of strong growth, and white, sweet-scented flowers and bright red berries.

Fragrantissima—The earliest to bloom, with small, delicately sweet pale pink flowers. The leaves are bright green and in sheltered situations last nearly all winter.

Morrowi—One of the handsomest. Grows to five or six feet, with white flowers and exceptionally good foliage. Can be kept trimmed and made into a compact hedge. Has bright red berries lasting till late fall.

Red Tartarian—Blooms in May, with small, bright pink flowers.

White Tartarian—Like the *Red Tartarian*, but with white flowers.

18 to 24 inch.....	.25	2.00
2 to 3 feet.....	.30	2.50

HYDRANGEA *Arborescens*. American Common Wild Hydrangea.

An attractive upright shrub growing to a height of four to six feet with white flowers in flat heads in early summer. Large, light green leaves. A native plant of the mountains and ideal for garden use. Very hardy.

	Each	Per 10
18 to 24 inch Tr.....	\$.35	\$3.00
2 to 3 feet Tr.....	.40	3.50

Arborescens Grandiflora. Snowhill Hydrangea.

Round heads of snowy white blooms in great profusion from early June to late September. Succeeds anywhere, but does best in a moist, shady situation. Especially valuable for its early blooming season.

	Each	Per 10
12 to 18 inch, Tr.....	\$.25	\$2.00
18 to 24 inch, Tr.....	.35	3.00
2 to 3 feet.....	.50	4.50

Paniculata Grandiflora. Peegee Hydrangea.

Individual flowers of the largest size, creamy-white, turning in late summer to pink. The blooms are very lasting, and if cut and taken into the house, they become dry without losing either size or color, and make handsome house decorations for the winter. Begins blooming mid-July, the flowers remaining and new ones being added till late October.

	Each	Per 10
12 to 18 inch, Tr.....	\$.25	\$2.00
18 to 24 inch, Tr.....	.35	3.00
2 to 3 feet.....	.50	4.50

Quercifolia. Oak Leaf Hydrangea.

Flat white flowers in clusters. A unique charm is the foliage, large, oak-like leaves, dark green above and silvery underneath, turning, in the fall, to glowing red. Make an attractive, spreading shrub, fine for massed effects.

	Each	Per 10
18 to 24 inch.....	\$.45	\$4.00
2 to 3 feet.....	.60	5.00

HYPERICUM *Prolificum*. St. Johnswort.

A bushy, low-growing shrub with many golden yellow flowers in summer. Useful in borders or where low growth is wanted.

	Each	Per 10
18 to 24 inch.....	\$.35	\$3.00
2 to 3 feet.....	.45	4.00

JASMINE Cape. *Gardenia Florida*. (See *Broad-leaf Evergreens*)

JASMINUM *Officinale*. Trailing Jasmine, Common White.

A graceful, vine-like shrub with numerous trailing branches with dark green glossy leaves and showy, fragrant, small white flowers.

	Each	Per 10
One-year plants.....	\$.40	\$3.50
Two-year Plants.....	.60	5.00

KERRIA *Japonica*.

Yellow-flowering and a very desirable shrub of spreading habits. Effective for massing. Attains a height of 6 to 10 feet.

CANNOT SUPPLY BEFORE FALL 1927.

	Each	Per 10
18 to 24 inch.....	\$.35	\$3.00
2 to 3 feet.....	.45	4.00

LIGUSTRUM. Privetts.

A numerous group of plants containing many beautiful varieties. They have dainty, white, fragrant flowers, followed by colored berries. They are handsome enough to stand singly but are better in groups where the differences in size of the various varieties give room for fine grouping and in combination with other plants. The California Privett allowed to grow naturally will make a tall screen, or fence, and is admirably adapted for such use.

But, it is as a hedge plant that Privett is pre-eminent. It is more largely used than all other hedge plants together, and in every section of the country. Privett has a tendency to throw many shoots, more than any other shrub; cut back closely, it throws up a mass of growth, which bears shearing perfectly. A privett hedge can be kept at any height; low or tall; and regular shearing will preserve

Hardy Flowering Shrubs (Continued)

a perfectly even surface, wall-like on the sides and on top, so dense as to support a man lying on it.

The leaves of all the privetts are abundant and rich green; that of California Privet being very glossy and holding its rich color under all conditions. In the South, and except in the extreme North, it is practically evergreen as are nearly all the privets. They succeed in almost any soil. Old, neglected hedges can be cut to the ground and yet throw up new growth that can be sheared into a perfect hedge, and the growth is faster than that of any other plant.

A single row of plants will make a good hedge; yet a fuller and more compact one can be made by planting two rows zig-zag, with the plants at the apexes of, say, eight-inch triangles. When set out, the plants should be cut back to a few inches; or they may be allowed to grow one year and should then be cut down close to the ground; they will make a hedge all the better for it, and bushy right to the ground. The next spring, they should be cut back to six or eight inches. This repeated, will force a dense growth, widely branching. Nothing makes so fine, so compact and so regular a hedge. The clipping shears can make the sides as smooth as a board and impenetrably thick. Do not let the roots dry; puddle when unpacked and plant at once.

AMUR RIVER NORTH PRIVETT.

This variety drops its leaves, but is very hardy and is widely used in the North, where the California Privet sometimes gets killed down. Makes a fine hedge.

PEARL BUSH. (See Exochorda)

PHILADELPHUS. Mock Orange (Syringa)

Generally upright growing shrub with white flowers, usually single, sometimes half double. Good foliage and very beautiful in bloom.

Coronarius—True Mock Orange. Flowers are small, single and deliciously fragrant. Reaches 8 or 10 feet ultimately.

Gordonianus—Large white flowers, appearing later than those of most varieties, therefore valuable as lengthening the flowering season.

Grandiflorus—Flowers large, white; leaves large. One of the leading varieties for specimen planting.

Mont Blanc—Noticeable for its great profusion of bloom, literally covering the plant.

Virginal—Large white-flowering, with good foliage and compact habit. Has long blooming season, flowers very fragrant.

2 to 3 feet.....	.50	4.50

RHUS Aromatica. Fragrant Sumach.

The Sumachs nearly all have wonderfully colored leaves in the fall and are highly prized for that attraction; their bright red leaves make a great show in the fall, throwing marvelous splashes of color against the landscape. Being rather large-growing, they fit best into broad groupings and tall backgrounds. The *Rhus Aromatica* is a short branching shrub, from 3 to 6 feet tall, with striking leaves and yellow flowers in clusters along the stems. The red berries mature in June and in the fall, the foliage is a riot of brilliant scarlet. Handsome and showy.

	Each	Per 10

3 to 4 feet.....	.50	4.00

CANNOT MAKE DELIVERY OF RHUS AROMATICA BEFORE FALL 1927, SPRING ALREADY EXHAUSTED.

Cotinus. Purple Fringe.

This is called the Purple Fringe or Smoke Tree. A very large shrub, making in time a fair-sized tree of most unusual and striking appearance. The great masses of misty, purplish flowers that cover the entire bush in June, make it look like a great mass of smoke, hence the name, Smoke Tree. The leaves color up in the fall.

	Each	Per 10

3 to 4 feet.....	.80	7.00
4 to 5 feet.....	1.00	8.00

Copallina.

Shining Sumach, with lustrous leaves, which change to rich crimson in the fall. Greenish-yellow flowers. Very effective, makes a great display in borders and back-grounds

	Each	Per 10
18 to 24 inch.....	\$.20	\$1.50
2 to 3 feet.....	.25	2.00
3 to 4 feet.....	.30	2.50

Glabra. Smooth Sumach.

Large and striking foliage, topped in the fall with great spikes of crimson seed, very ornamental in effect. Fine autumn coloring; good on rocky or poor soils.

	Each	Per 10
18 to 24 inch.....	\$.15	\$1.00
2 to 3 feet.....	.25	1.50
3 to 4 feet.....	.35	2.00

Typhina. Staghorn Sumach.

Grows in irregular bush form up to 10 feet, and is very good for

grouping in large plantations. The leaves are large and bright green, but become brilliantly colored in the fall. An advantage enjoyed with most Sumacs, is that it thrives in poor soil.

	Each	Per 10
18 to 24 inch.....	\$.20	\$1.50
2 to 3 feet.....	.25	2.00
3 to 4 feet.....	.30	2.50

ROBINA Hispida. Moss Locust (*Rosa* *Acacia*)

A native dwarf bush that sprawls upon the ground, rarely growing taller than 2 or 3 feet. But, it is very showy, with good leaves and rose-colored or lavender-colored flowers that hang in clusters like *Wisteria*. They bloom in April and appear at intervals all through the summer. This is an odd and unusual plant that ought to be better known and more widely planted. Its size and shape are an advantage as relieving monotony in plantings and it is always a worthy addition to the plant lover's garden.

	Each	Per 10
18 to 24 inch.....	\$.35	\$3.00
2 to 3 feet.....	.50	4.00

SNOWBERRY Red. *Symphoricarpos* *Vulgaris* (Indian Currant)

This is the Red-fruited Snowberry. A small plant whose slender branches are covered with small purple berries that are very bright and showy and last all winter. The birds will come and stay with you and enjoy these berries as much as you do.

	Each	Per 10
18 to 24 inch.....	\$.25	\$2.00
2 to 3 feet.....	.30	2.50
3 to 4 feet.....	.50	4.00

White Snowberry (*Symphoricarpos* *Racemosus*)

Those who plant gardens ought to give more thought to the wonderful beauty of the berry-bearing plants. This is one of the best. A shrub that grows to 5 or 6 feet and has small pink flowers; but its great attraction is the large, milk-white berries that form after the flowers drop; the berries last until mid-winter. They add a mighty attractive feature to the garden. All berry-bearing plants do.

	Each	Per 10
18 to 24 inch.....	\$.30	\$2.50
2 to 3 feet.....	.40	3.50

SPIREAS.

One of the most desirable groups of plants. The great variety of sizes and shapes, the riotous extravagance of their bloom and the season they cover, from early to late, some being everblooming, give them a place hardly equalled by any other single group. They are much used for hedges, borders, specimens and massing.

Anthony Waterer—A low-growing, dwarf, very bushy plant that bears small heads of bright crimson flowers all during the summer.

	Each	Per 10
12 to 18 inch.....	\$.50	\$4.00
18 to 24 inch.....	.75	6.00

Billardi Alba—Makes a narrow, thick shrub, bright with dense panicles of white flowers, from July on until Fall.

Billardi Pink—Similar to the last named, except that the flowers are pink.

	Each	Per 10
12 to 18 inch.....	\$.25	\$2.00
18 to 24 inch.....	.35	3.00
2 to 3 feet.....	.40	3.50

Hardy Flowering Shrubs (Continued)

Blue Spirea (*Caryopteris Incana*)—Has a sage-like leaf. The blue flowers which are very pretty, appear in July and continue until frost.

	Each	Per 10
18 to 24 inch.....	\$.30	\$2.50
2 to 3 feet.....	.50	4.50

Callosa Alba—Dense, low-growing bushes, with white flowers in small, flat heads. Grows freely and blooms nearly all summer.

Callosa Rosea—Same as above, only the flowers are rose colored.

	Each	Per 10
18 to 24 inch.....	\$.25	\$2.00
2 to 3 feet.....	.30	2.50

Opulifolia—Ninebark. Very vigorous and upright, with clusters of flat flowers, followed by red berries.

	Each	Per 10
18 to 24 inch.....	\$.25	\$2.00
2 to 3 feet.....	.30	2.50

Prunifolia—Northern Bridal Wreath. Strong, irregular growing, shining leaves coloring in autumn and diminutive, very double, rose-like white flowers in great abundance in May.

	Each	Per 10
18 to 24 inch.....	\$.30	\$2.50
2 to 3 feet.....	.35	3.00

Reevesiana—Throwing out long branches that curve gracefully and covered with clusters of double white flowers.

It is a small growing tree, with large pinnate leaves; flowers orange-yellow in July, an unusually good lawn tree.

	Each	Per 10
18 to 24 inch.....	\$.40	\$3.50
2 to 3 feet.....	.75	6.50
3 to 4 feet.....	1.00	9.00

VIBURNUMS.

This family includes the familiar Snowballs. They are all hardy, have unusually rich, glossy abundant leaves and are especially free from attacks of injurious insects. They are invaluable in landscape work in massed plantings, in borders and groups. Most of these varieties will grow satisfactorily in shaded places, but of course, will do better in the open sunlight. Beautiful autumnal coloring heightens the attractiveness of the leaves of some varieties, while others have the added beauty of ornamental berries.

Acerifolium (Maple-leaved Viburnum)—Slender branches, maple-like leaves, creamy white flowers in late spring and black berries following. Grows from 3 to 5 feet high.

	Each	Per 10
18 to 24 inch.....	\$.25	\$2.00
2 to 3 feet.....	.40	3.50
3 to 4 feet.....	.60	5.00

Hardy Flowering Shrubs (Continued)

Dentatum (Arrow-wood)—Bright green, heart-shaped leaves that turn to red and purple. The flowers, in May and June, are creamy white. Grows from 8 to 12 feet.

18 to 24 inch.....	\$.25	\$2.00
2 to 3 feet.....	.40	3.50
3 to 4 feet.....	.60	5.00

Opulis Sterile (Common Snowball)—A fine shrub, bearing globes of snowy white flowers. One of the old garden favorites. Blooms in May.

	Each	Per 10
18 to 24 inch.....	\$.45	4.00
2 to 3 feet.....	.65	6.00
3 to 4 feet.....	.90	8.00

Opulus (High Bush Cranberry)—A tall shrub with upright spreading branches, 8 to 10 feet, widely distributed in the Northern Hemisphere. Leaves broadly ovate, 3-lobed, bright green. Flowers white in late spring and early summer. Berries scarlet, persisting all winter, very showy.

	Each	Per 10
12 to 18 inch.....	\$.40	\$3.00
18 to 24 inch.....	.60	5.00
2 to 3 feet.....	1.00	8.00

Plicatum (Japanese Snowball)—Blooms in May. Upright with spreading habit, bearing an abundance of white balls, that have a wonderful setting in the deep green leaves.

	Each	Per 10
18 to 24 inch.....	\$.45	\$4.00
2 to 3 feet.....	.65	6.00
3 to 4 feet.....	.90	8.00

Prunifolium (Black Haw)—A large shrub, almost a small tree, with large oval leaves that color brilliantly in fall. Pure white flowers are followed by bluish-black fruits. The fruits are edible.

	Each	Per 10
18 to 24 inch.....	\$.40	\$3.00
2 to 3 feet.....	.60	5.00
3 to 4 feet.....	.75	6.00

Tomentosum (Doublefile Viburnum)—Beautiful dark green leaves, gorgeous crimson in the fall. White flowers borne in clusters in May.

	Each	Per 10
18 to 24 inch.....	\$.25	\$2.00
2 to 3 feet.....	.35	3.00

VITEX. Chaste or Lavender Tree.

Flowers and foliage noted for the distinctive lavender fragrance. Stands much abuse. Flowers from May until July and some few flowers until frost. Can supply two varieties, Agnus Castus and In-cissa. There is but little difference in the two varieties.

	Each	Per 10
18 to 24 inch.....	\$.25	\$2.00
2 to 3 feet.....	.35	3.00
3 to 4 feet.....	.50	4.00

WEIGELIA Diervilla.

The Weigelias are another beautiful family of plants, of many colors, adding beauty to all shrub groups where the taller varieties are not out of place. Most varieties grow quickly to an ultimate height of 6 or 8 feet, and with long arching branches. During May, June and July, they bear a great profusion of bell-shaped flowers, which closely hug the stems. The leaves, always bright and green, afford proper background for their colors. No collection of flowering shrubs, however small, can afford the absence of Weigelias. They are among the best plants we have.

Amabilis—Grows to about 6 feet, with rich, dark green leaves and very attractive rose-colored flowers.

Desboisi—The flowers are deep rose-colored; one of the best.

Hendersonia—One of the strongest growing Weigelias, with large flowers of a deep rose color.

Mme. Lemoine—One of the prettiest of the Weigelias. Flowers bluish-white, changing to deeper pink.

Rosea—Best known and most popular variety of Weigelias. Deep pink blossoms, borne in wonderful profusion. Make a great show in June.

Variegated Leaf—Leaves bordered with yellowish-white, making the bush very conspicuous the entire season. Pink flowers bloom early.

	Each	Per 10
18 to 24 inch.....	\$.20	\$1.75
2 to 3 feet.....	.30	2.25
3 to 4 feet.....	.40	3.50

XANTHORRHIZA. Yellow-root.

A low shrub with handsome airy foliage that assumes a beautiful golden color in autumn. Splendid for massing as a ground cover. Thrives in almost any moist fertile soil. Have only a limited supply for Spring delivery, plenty for Fall 1927.

	Each	Per 10
Two-year Transplants.....	\$.35	\$3.00

Evergreens

Hardy Coniferous Evergreens are particularly valuable for use in all classes of ornamental planting, inasmuch as they preserve their graceful foliage and rich coloring throughout the summer and winter, adding much to the charm of the Landscape during that period when deciduous trees and shrubs are without foliage. Without the evergreen the home is lacking that one thing that makes it complete.

ARBOR VITAE, American. *Thuja Occidentalis*.

Dark green foliage. Grows easily and rapidly in most any soil. planted alone, in pairs or in the edge of a group of taller growing to grow will make tall screen when planted closely.

	Each	Per 10
18 to 24 inch.....	\$.75	\$7.00
2 to 3 feet.....	1.25	10.00
3 to 4 feet.....	1.75	15.00

ARBOR VITAE, Berkman's Golden. *Thuja Orientalis Aurea Nana*.

Dense, compact form, golden color and always beautiful, whether planted alone, in pairs or in the edge of a group of taller growing evergreens. Never gets too tall.

	Each	Per 10
12 to 18 inch.....	\$2.00	\$18.00
18 to 24 inch.....	3.50	30.00
2 to 3 feet.....	4.50	40.00

ARBOR VITAE, Chinese. *Thuja Orientalis*.

Similar to the American. May be used in combinations and groups or planted as a single specimen. Dark green foliage more compact than the American but both varieties are inclined to grow open when left untrimmed.

	Each	Per 10
18 to 24 inch.....	\$.75	\$ 7.00
2 to 3 feet.....	1.25	10.00
3 to 4 feet.....	1.75	15.00

ARBOR VITAE, Compact. *Biota Orientalis Compacta*.

More compact or dense foliage than the Chinese and a finer, lighter green foliage. Broad cone shaped growth. Very beautiful.

	Each	Per 10
12 to 18 inch.....	\$1.00	\$ 8.00
18 to 24 inch.....	1.75	15.00
2 to 3 feet.....	2.50	22.50
3 to 4 feet.....	3.50	

ARBOR VITAE, George Peabody. *Thuja Occidentalis Lutea*.

Conspicuous golden yellow form—columnar outline. A distinctive lawn plant.

	Each	Per 10
12 to 15 inch.....	\$1.00	\$ 9.00
15 to 18 inch.....	1.50	12.50

ARBOR VITAE, Globe. *Thuja Occidentalis Globosa*.

A perfect globe when well grown. Light green foliage. A dwarf evergreen the spread usually equaling the height.

	Each	Per 10
12 to 18 inch.....	\$2.00	\$18.00
18 to 24 inch.....	3.00	27.50

ARBOR VITAE, Hovey's Golden. *Thuja Occidentalis Hoveyi*.

Attractive yellowish-green foliage. A dwarf variety. Dense

growth. Useful for porch boxes or foundation planting.

	Each	Per 10
12 to 18 inch.....	\$2.00	\$18.00
18 to 24 inch.....	3.50	30.00

ARBOR VITAE, Pyramidal. *Thuja Orientalis Pyramidalis*.

Straight erect Pyramidal shaped evergreen. Densely branched with rich dark green, glossy foliage. One of the best for specimen planting or for striking effect when planted as center for groups. Useful to plant to break height of tall houses or at corners and doorways.

	Each	Per 10
18 to 24 inch.....	\$2.50	\$20.00
2 to 3 feet.....	3.00	25.00
3 to 4 feet.....	4.50	40.00

ARBOR VITAE, Rosedale. *Thuja Orientalis Rosedaleana*.

Another Compact Evergreen. A fine feathery bluish foliage, somewhat resembling the *Retinospora*. It holds its regular form. Very popular in the South, not hardy in the extreme North.

	Each	Per 10
12 to 18 inch.....	\$1.00	\$ 9.00
18 to 24 inch.....	1.75	15.00
2 to 3 feet.....	2.25	20.00

Hardy Climbing Vines

Vines are useful in many ways. They give quick results when planted on a new place, before trees and shrubs become established. For covering fences, rocks, walls, banks and trellises, they are peculiarly adapted. A porch without a vine is desolate and incomplete.

AMPELOPSIS Englemanni. Engleman Ivy.

A new variety of Woodbine which has long been desired. It has short joints and small, very thick foliage, which in fall turns to a pretty red color. Will grow in any soil and withstands drought and heat.

	Each	Per 10
2 year Transplanted.....	\$.30	\$2.50

Quincefolia. Virginia Creeper or American Ivy.

Large deep cut leaves that turn to beautiful crimson in the fall. Does not cling to stone or brick but makes a quick and rampant growth, covering objects that offer support.

	Each	Per 10
2 year Transplanted.....	\$.25	\$2.00
3 year Transplanted.....	.30	2.50

Veitchi Boston Ivy.

One of the finest climbers for covering walls, as it clings firmly to the smoothest surface, covering it evenly with overlapping leaves, which form a perfect mass of foliage. The leaves turn to brilliant orange and crimson in the fall.

	Each	Per 10
Medium	\$.35	\$3.00
2 year Transplanted.....	.55	5.00

BIGNONIA RADICANS. Trumpet Vine

A native, hardy, strong climbing vine with good leaves and scarlet trumpet-shaped flowers in summer.

	Each	Per 10
1 year Seedlings.....	\$.20	\$1.50
1 year Transplanted.....	.25	2.00

CELASTRUS SCANDENS. Bitter Sweet.

A native climber with handsome, glossy foliage and large clusters of beautiful orange-crimson berries, remaining all winter. Very bright in effect and charming for winter house decorations.

	Each	Per 10
1 year Seedlings.....	\$.20	\$1.50
2 year Transplanted, heavy.....	.35	3.00

CLEMATIS Paniculata. Japanese White.

This handsome hardy climber is one of the choicest and most satisfactory climbing flowering plants. The small, creamy-white, star-shaped flowers are delicately fragrant, blooming in late summer in wild profusion.

	Each	Per 10
2 year Plants.....	\$.30	\$2.50

Virginiana. Wild Clematis.

A native climbing Clematis, similar to the Paniculata. Very hardy.

	Each	Per 10
2 year Plants.....	\$.30	\$2.50

Jackmani.

The most popular of all; extremely free-flowering, the blooms four-petaled, ribbed at the middle and of beautiful velvety color purple.

Henryi.

Usually five-petaled, immense, pure white single blooms. This is the finest of all large flowering white Clematis and should find a place in every collection.

Madame Edouard Andre.

Has been called the crimson Jackmani. The plant is a strong, vigorous grower, very free in bloom. Its color of the finest red.

Ramona.

Flowers of gigantic size—six inches in diameter—and a fine light-blue color.

Duchess of Edinburgh.

With very double white flowers. Very fragrant.

	Each	Per 10
Strong 2 year Vines.....	\$.60	\$5.50

DUTCHMAN'S PIPE VINE, Aristolochia Tomentosa.

Brownish, pipe-shaped flowers. Highly useful for its large leaves which make a perfect screen for porches.

	Each	Per 10
1 year seedlings.....	\$.20	\$1.50

HEDERA Helix. English Ivy.

The famous English Ivy with its familiar evergreen. When you read of old "Ivy mantled towers" it means the English Ivy. Clings to stone and grows to a great height, covers walls entirely. Fine for South but not hardy where winters are severe with sudden changes.

	Each	Per 10
Small plants.....	\$.15	\$1.25
Transplanted30	2.00

HONEYSUCKLE, Halls Japan. Lonicera Halliana.

Dark green dense foliage, almost evergreen, with fragrant white flowers changing to yellow. A good old dependable Honeysuckle that grows rank under any conditions.

	Each	Per 10
Medium	\$.15	\$1.00
1 year No. 1 Transplanted.....	.20	1.50
2 year No. 1 Transplanted.....	.30	2.50

Scarlet Trumpet. Lonicera Sempervirens.

A hardy Honeysuckle with trumpet-shaped flowers of bright scarlet.

	Each	Per 10
2 year Transplanted.....	\$.25	\$2.00
3 year Transplanted.....	.30	2.50

Hardy Climbing Vines (Continued)

LYCIUM Barbarum. Matrimony Vine.

Throws out very long branches with a decided tendency to droop, therefore especially valuable for covering slopes or embankments; suitable for porches, the foliage being very rich and handsome. Will grow in any soil. Has bright red berries.

	Each	Per 10
2 year plants, Strong.....	\$.25	\$2.00

PUERARIA Thunbergiana. Japan or Kudzu Bean.

Makes the most marveous growth of any vine, often as much as 50 feet in a season; its large leaves makes a dense shade. The flowers are rosy-purple, pea-shaped and common in August.

	Each	Per 10
1 year Seedling.....	\$.15	\$1.00
2 year, Strong.....	.25	2.00
3 year Strong.....	.35	3.00

A fast growing vine deep cut sea-green leaves and fragrant blue flowers.

	Each	Per 10
1 year Plants.....	\$.15	\$1.00
2 year, Transplanted.....	.25	2.00

VINCA MINOR, Myrtle Blue. Common Periwinkle.

An old-fashioned popular vine, evergreen and fine for ground covering, growing well in the shade; useful also for porch and window boxes. Has light blue flowers.

	Each	Per 10
Small layers.....	\$.10	\$.80
Clumps.....	.30	2.50

VITIS Aestivalis. Summer Grape.

Not planted for fruit but for the ornamental value of its hand-

some foliage. A very strong growing vine.

	Each	Per 10
2 year.....	\$.20	\$1.50

Cordifolia. Frost Grape.

A vigorous growing vine with bright green foliage and purplish black berries that ripen and hang on until frost. Very ornamental.

	Each	Per 10
2 year.....	\$.20	\$1.50

Labrusca. Fox Grape.

A strong rapid growing vine with large thick leaves and purplish black berries that change to reddish brown.

	Each	Per 10
2 year.....	\$.20	\$1.50

Rotundifolia. Muscadine Grape.

Vigorous growing vine with heavy, showy foliage.

	Each	Per 10
2 year.....	\$.20	\$1.50

WISTERIA.

Woody vines with tightly clinging habit, for pergolas, arbors, trellises, etc., especially ornamental in early summer when they are resplendent with their large, drooping clusters of fragrant blossoms.

Sinensis, Chinese Purple Wisteria.—Blossoms profusely in May; a strong-growing, long-lived vine with purple flowers.

Sinensis Alba. Chinese White Wisteria. A white-flowered form of the type, with graceful pendant clusters of bloom in May. Very rare.

Magnifica, Common Purple. An unusual and particularly handsome variety with immense clusters of large flowers, lavender-colored, in dense drooping racemes.

	Each	Per 10
2 year Medium.....	\$.25	\$2.00
2 year Transplanted.....	.35	3.00

Summer and Autumn Flowering Bulbs and Perennials

PAEONIAS.

The clumps are what is known as three to five-eye divisions. They should be planted so that the top eye will set two inches below the top of ground. If planted too deep they will not bloom.

Peonies in Colors: Red, White and Pink.

Price, 35c Each; \$3.50 per Dozen.

Named Varieties.

Duchess de Nemours, Ivory white	Candissima, Pale pink
Duke of Wellington, Sulphur white	Festiva Maxima, pure white
President Roosevelt, Red	Queen Victoria, White
Mad. de Verneville, white	Formosa, Pink
Mad. Forel, Pink	Gloire de Boskoop, pure white
Mary Stewart, crimson	

Mixed colors, unnamed. Price 30c each; \$3.00 per doz.

La Pearl, Price 50c each; \$5.00 per doz.

GLADIOLUS BULBS

Gladiolus bulbs are without doubt the most satisfactory bulbs you can plant in your garden. So easy to cultivate and when planted in rotation, say about two weeks apart until the end of June, you can have a succession of cut flowers for your home until frost. Take the bulbs up in the fall and preserve them in a cool cellar until the following spring.

Prices

Number 4, small bulbs, 25c per dozen; \$2.00 per 100
Number 3, small bulbs, 1 inch, 35c per dozen; \$3.00 per 100
Number 2, small bulbs, 1 1-4 inch, 50c per dozen; \$4.00 per 100
Number 1, small bulbs, 1 1-2 inch, 75c per dozen; \$6.00 per 100

Varieties

Marshal Foch, Rose pink	America, pale pink
Cracker Jack, red	Mrs. Francis King, Vermillion
Willbrink, early bloomer flesh pink	Primulinus, mixed colors
Prince of Wales, Salmos Pink	Hereda, Rose Pink

Summer and Autumn Flowering Bulbs and Perennials (Continued)

CANNA ROOTS

Cannas are still the most magnificent of all summer-blooming plants for brilliant bedding and massing. They are tropical looking and the rank green foliage and gay flowers make a brilliant sight. Plant about six inches deep in rich moist soil when weather is warm and settled.

Prices

60c per dozen; \$5.00 per 100.

Varieties.

Canary, Yellow flower	Mme. Crozy, Vermillion and Golden
Florence Vaughan, yellow dotted red	California, deep yellow
King Humbert, Red, Bronze leaf	Indiana, Orange orchid
	King Humbert, Yellow

Mixed Varieties and colors, 40c per doz.; \$3.50 per 100

DAHLIAS

Dahlias are among the finest late blooming plants in the garden. They show a wide range of color in various forms and a mixed bed will display a wealth of beauty in the late summer and early fall.

In colors, Red, Pink and Yellow.

Prices.

25c each; \$2.00 per dozen.

Varieties.

Silvia	Judeth
Pink Rose	Tom Walker
California yellow	

IRIS GERMANICA

German Iris—The tall sword-like leaves are interesting in themselves until the gorgeous flowers, with their unusual form, their beautiful variegated and numerous shades of color make their appearance in May. We have the following varieties:

Prices.

50c per doz.; \$4.00 per 100.

Roses—Hardy Out-Door Grown Bush Roses

The very name of roses carries with it the suggestion of the greatest perfection and beauty of the world of vegetation. No arrangement is satisfactory that neglects them, in fact, they are indispensable. The stock we offer is field-grown, acclimated to the outdoor life and will make much quicker and more hardy growth than the greenhouse plants offered by rose specialists.

Roses, 2 Year No. 1.		Each	Per 10	frost	Each	Per 10

Fruits

We do not grow fruit trees ourselves, but so many of our customers prefer to have us fill their complete orders that we are prepared to do that, buying our supply of fruit trees from reliable growers and shipping with our ornamentals which makes it very convenient for our friends. In this way, we buy nothing but the best and handle only what we would be willing to plant ourselves.

APPLES

The Apple is the staple fruit of the United States it can be grown over almost the entire area of our country. The varieties we describe here have been carefully selected for many points; they are all staple, standard, dependable varieties, that have been thoroughly tested for years, and they are such that we can recommend for average conditions. We indicate by letters the season for ripening, "S" Summer; "A" Autumn; "W" Winter.

Varieties.

Early Harvest, S. Yellow; not striped. Fruit medium size, roundish. Popular for table and cooking. Tree productive; comes into bearing very young.

Alexander, A. A large, red, striped apple with yellowish flesh, crisp rather juicy and sub-acid. The tree is a moderate grower and recommended for the extreme north.

Baldwin, W. Is known to almost every fruit grower and housewife as a good cooking apple that keeps well in storage—it is a good drying apple. Tree a strong vigorous grower.

Ben Davis, W. Large roundish, red. Tough skin. Striped and splashed with dark red. Flesh white. Bears young, keeps well.

Delicious, W. Color striped and marked with light and dark red. Fruit is large, of uniform size, round and long, tapering with a markedly ribbed nose. Tree is hardy, bears abundantly.

Gano, W. Sour. Red; not striped. Flesh pale yellow, fine grained, tender and pleasant. A favorable "apple butter" kind.

Red June, S. A handsome red apple with tender flesh of first-rate quality; one of the most popular early apples.

Fall Pippin, A. Greenish-yellow, not striped. Fruit large, roundish oblong. Recommended as an especially good cooking apple.

Arkansas Black, A. Large round, smooth; often very black flesh yellow, juicy and delicious when ripe; cooking or market; splendid keeper. Tree vigorous, hardy and abundant bearer.

Grimes Golden, W. A high quality apple of delicious flavor; hardy, very productive and a favorite in home orchards.

Jonathan, W. Striped and splashed with dark red; excellent quality and highly flavored; profitable for market and splendid family sort. A good money-making apple.

Mammoth Black Twig, W. A seedling of Winesap, which it resembles in every way except that the tree is a better and much more vigorous grower, more hardy and the fruit is much larger. Color dark red.

Yellow Transparent, S. The best and most productive yellow summer apple; one of the earliest to ripen; the tree is vigorous and does well nearly anywhere.

Maiden Blush, A. Medium size, smooth, beautifully flushed with red on creamy-yellow; flesh tender, of pleasant but not high flavor. Tree a fair grower and productive.

Kinnard's Choice, A. Large, dark red. Resembles the Arkansas Black. One of the best fall apples. Good for market or table.

Rome Beauty, W. Large, round, red, juicy and a good quality. Bears early.

Talman Sweet, W. Medium to large, round, fairly uniform size. Comes into bearing moderately young and is usually a reliable cropper.

Stayman's Winesap, A. A seedling of Winesap. Improved. Originated by the late Dr. J. Stayman at Leavenworth, Kansas. Dark rich red. No apple is being more widely planted.

Northwestern Greening, W. Fruit medium to large. Ranks as dessert apple. Cooks evenly and when cooked has a fine yellow color. Keeps very late in good condition. Originated in Wisconsin.

Winesap, common, W. Medium dark-red sub-acid. Tree an abundant bearer. One of the finest cider apples grown. November to April.

PEACHES

Starting with the blossoms or the flowers, the peach tree is valuable for its ornamenting beauty. As orchard trees or planted at the home, the trees usually come into bearing at an early age. What tastes better in the peach fruit season than a good juicy peach with its appetizing aroma?

Varieties.

Belle of Georgia, Mid-season. Very large, white, with a deciden blush; firm, white flesh of delicious flavor. Bears regularly. Free.

Carman, Early. Free. Large, roundish, with a pale yellow skin; flesh white and sweet. Ripens here about July 1st, is very hardy and a good all-round peach.

Crawford Early. Free. Large, rather oblong, with yellow skin and yellow flesh; of excellent quality.

Champion, Early. Free. Many specimens have measured 10 inches in circumference. The flavor is delicious, rich, sweet and juicy; skin creamy, with red cheeks. Ripens last of July.

Early Elberta. Free. Like the Elberta but ripens a little earlier.

Elberta, Mid-season. Free. The staple, standard peach wherever peaches are grown. A large, yellow peach, shaded with red; yellow flesh. Dependable as a regular and uniform bearer.

J. H. Hale, Mid-season. Free. The beautiful peach that Hale, the Georgia Peach King, gave his name to. Large, round, yellow and neatly covered with red. Very firm fleshed and of fine quality.

Hiley, Early. Free. Large, creamy-white, with red cheek; white fleshed and juicy. Ripens around the first of July.

Mayflower, (May) Early. One of the earliest peaches. Red all over. Tree a strong, grower, late bloomer and heavy bearer.

Indian Blood, Cling. Red-fleshed, very firm; fine for preserving.

Red Bird Cling. Creamy-white, nearly covered with red; a semi-cling-stone like most very early peaches.

Fruits (Continued)

Slappy, Free. Ripens at a season when the market is bare of good peaches. The earliest and most handsome free-stone peach that grows. Best peach of its season. July.

Stump of the World, Late. White fleshed, free-stone peach. Its quality is excellent, the flesh being melting, juicy, rich and good. Trees are large, hardy, vigorous and productive.

CHERRIES

At least a few Cherry trees should be in the orchard. They are almost a sure crop each year. Our Cherry trees are grown in Indiana on soil especially adapted to growing sturdy, healthy and hardy trees, free from disease and first class in every respect.

Varieties in Sweet.

Black Tartarian. The favorite sweet Cherry; fruit large and very dark red almost black when ripe; flesh firm and of delicate, high quality. Early to middle of June.

Governor Wood. A very desirable Cherry as it bears immediately after the Black Tartarian—should be in every cherry orchard. Fruit large, yellow, nearly covered with bright red.

Napoleon. An ideal light colored sweet cherry; especially good for shipping. Much sought after by canneries. Very attractive coloring of pale yellow with amber cheek. Tree large, vigorous, upright and very productive.

PEARS

Pear trees succeed in fairly good, well drained soil, but they do best in a strong loam or clay. Both quality and juiciness of the fruit may be improved if it is gathered about a week or ten days before maturity and ripened indoors. A cool, dark place is best for storing it while ripening.

Varieties

Bartlett. Best known and a great favorite; golden yellow with red cheek, fine grained, melting, of delicious quality; bears when very young.

Early Harvest. Large, yellow with red cheek; trees strong and healthy; bears regularly and is recommended for early fruit.

Garbér. Tree free from blight and immensely productive. Fruit large resembling the Keiffer, but ripening two or three weeks earlier.

Flemish Beauty. The fruit is of extra large size, varying however in size and shape. The color is a yellowish green, overlaid with russet markings. Of good quality which can be improved by ripening indoors. Unusually fruitful.

Keiffer. A seedling of the Chinese Sand Pear. Fruit large to very large. Keiffer is not a high quality pear, but is good for canning and cooking and it is always there with pears every year.

Prices.

	Per 10	Per 100
2 to 3 feet, 1 year whips	\$2.00	\$17.50
3 to 4 feet, 1 year whips	3.00	25.00
4 to 5 feet, 1 year whips	4.00	35.00

PLUMS

Plum trees thrive in a great diversity of soil, but seem to require that the soil have good drainage; warmth of soil is a factor towards perfection. Plums require little pruning but thinning the fruit on all varieties should be the regular practice. The general demand for the fruit is to "eat out of hand," for pies, sauces, preserves, plum butter, marmalades and jelly.

Varieties.

Abundance. One of the largest, best and hardiest of the Japanese plums. Pale amber, turning to red; yellow, sweet flesh.

Burbank. Large, deep red, with yellow flesh; juicy and sweet; tree vigorous and strong. Another of the Japanese variety.

German Prune. Skin purplish-black with thick bloom; flesh greenish-yellow changing to yellow. One of the oddest plums, probably the oldest of the prunes. Tree fairly hardy, vigorous, healthy and productive.

Kelsey Japan. Very large, heart-shaped color green, changing to rich yellow, nearly overspread with brilliant red when fully ripe. Flavor excellent, very sweet. Tree an immense bearer.

Red June. Of the Japanese variety. Skin garnet-red; flesh light yellow somewhat meaty sweet, good; season early, ripens a week or so before the Abundance. Trees are large vigorous, spreading, hardy, healthy, productive.

Shropshire Damson. Skin purplish-black thick bloom, dots numerous; flesh gold'n yellow. Season late, fruit small in size. An old well-known variety.

Prices.

	Per 10	Per 100
2 to 3 feet	\$3.00	\$25.00
3 to 4 feet, 7-16 to 9-16	4.00	35.00
4 to 5 feet, 9-16 to 11-16	5.00	40.00

APRICOTS

The season for ripening, coming between the Cherries and Peaches, makes this fruit very desirable and valuable. Apricots are steady bearers and the fruit is easy to raise; and there are hardly ever enough of them in the market to supply the demand. Considered as an ornamental tree alone, the Apricot is unsurpassed.

Varieties.

Royal. Probably the most extensively planted apricot in cultivation.

Fruits (Continued)

Size, medium, color, deep yellow, flesh pale orange, with very rich vinous flavor. A most desirable variety for canning and drying.

Tilton. Fruit orange yellow with a pronounced flavor. As a dryer and canner it cannot be surpassed.

Moorpark. Color is wholly pale orange. Fruit small one and a half inches in diameter; flesh orange-yellow. Tree hardy and productive.

Prices.

PRUNES

Plums of the European class mostly used for drying. Nearly all freestones and very sweet. Do not bear as young as plums of other classes.

Varieties.

Standard. Very large, blue, sweet and fine for fresh fruit; needs pol-
lenizer.

Sugar. Earlier, larger and sweeter than the French, not quite so good
a dryer. Heavy bearer in some localities, not so good in others.

Improved French. Select strain chosen for large size and heavy bearing
qualities. We have the strain now preferred in the prune drying
districts.

Fellenburg, (Italian Prune.) Skin purplish with very thick bloom;
flesh greenish-yellow changing to yellow; juicy, firm, sub-acid, free-
stone; season late and short. Originated in Italy more than a cen-
tury ago.

Prices.

3 to 4 feet.....	.65	5.00
4 to 5 feet.....	.75	6.00

FIGS.

A unique combination of delicious flavor, healthfulness, adaptability
in cooking, heavy sugar content and no acid, making increasing con-
sumption a certainty. Figs are more difficult to transplant than any
other tree except the persimmon. Small fig trees live better than the
larger sizes. We recommend 18 to 24 inch sizes, or even smaller. We
only have one variety.

Brown Turkey. Large, brown. Resembles the Brunswick; probably
better it is sometimes called the Brunswick.

Prices.

BLACKBERRIES

Every garden ought to have some blackberries in it; they usually
come into bearing the next year after they are set out in the spring;
they fruit after the raspberries are gone and before the stone fruits are
ripe. They make wonderful pies, short-cakes and the most delicious
jam, the juices can be made into material for beverages that are health-

ful as well as pleasing and refreshing and the markets are always glad
to buy the surplus.

Varieties.

Blowers. The berries are large size, jet-black and are of delicious qual-
ity. A good shipper, making a popular and profitable market variety;
bush is vigorous, is hardy and bears heavily.

Early Harvest. Valuable as one of the earliest; berries of medium size
and good quality; strong grower and exceedingly prolific.

Eldorado. Is very hardy, enduring the winters of the far northwest
with safety, very productive, and of extra fine quality. Dependable
variety to plant.

Snyder. Another productive variety which is very hardy. Fruit is
early, medium sweet and of good size. Entirely free from hard core
which so many varieties have. An old and long tried blackberry.

RASPBERRIES

Throughout most of the country, Raspberries hold a prominent place
among the small fruits. They are earliest, for one thing, and ripen
when folks are hungry for fruit. Throughout the north Raspberries
hold an economic place of importance, usually bear fruit the following
season if set out in the spring. They begin to ripen early in July.

Varieties.

Columbian, Purple. Berries of very largest size known; bush of extra
strong growth and great bearing quality; large juicy and sweet; the
favorite canning variety.

Cumberland, Black. Early, good size, firm berries of fine quality; bush
healthy vigorous and productive; dependable, staple, popular.

Cuthbert, Red. An old and tested variety, remarkably strong and
hardy; withstanding the cold of the northern states and the heat of
the southern as well.

Gregg, Black. Berries large, firm, shipping well; black with light
bloom; few seeds; quality good; makes very strong canes.

St. Regis, Everbearing, Red. Large sweet berries of attractive red. Will
continue to fruit until the first snows of winter, which often make
it profitable for a late market fruit; will also produce a good crop
in July.

Prices for Blackberries and Raspberries.

STRAWBERRIES

Called "The Queen of Small Fruits." Tempting in appearance and
delicious in taste. Strawberries will succeed in any soil that is adapted
to ordinary farm and garden crops. To produce, fine large fruit, keep
in hills, pinching runners off as soon as they appear.

Varieties.

Aroma	Kellogg's Perfection	New York
Campbell's Early	Klondyke	Progressive, E. B.
Champion	Lady Thompson	Senator Dunlap
Gandy	Lupton Late	Tennessee

Prices.

Per 10, 35c; per 100, \$3.00; per 1000, \$25.00.

GRAPES

Grape vines should be planted where they will have the sunshine to grow the vine and ripen the berries, thus developing the sugar content of the fruit, as they respond beautifully to warmth. Grape vines may be considered as ornamental vines and planted along fences or trained on garages. Commercially the grape is profitable, has many home uses and every home should have a selection of grape vines.

| 6 Forsythias, Assorted colors | 4 Abelia Grandiflora |

All For \$29.85.

One half of this entire Selection for Only \$15.75

Many Catalogues from many business concerns contain letters of appreciation from a number of their customers. We have had such letters in some issues of our Catalogues in the past. In our files right now we have a great many letters stating their appreciation of the quality of stock sent them and for the attention given the orders. It's a genuine satisfaction to get such letters and we hope our customers will continue to say such things to us.

However in this issue we have not used any of these letters for publication. Many would give their permission for us to do so but what we have done is not so important with those who contemplate sending their orders now, as how we can and will handle your present and future orders. We feel sure that our stock will entirely please you and it's certainly our purpose to serve you well. Our future depends on the reputation we make.
